ABSTRAK

Perdagangan tambang memegang peranan penting dalam perekonomian. Pertambangan adalah rangkaian kegiatan dalam rangka upaya pencarian, penambangan, pengolahan, pemanfaatan dan penjualan bahan galian. Beberapa hasil perdagangan perusahaan tambang merupakan perdagangan yang penting bagi dunia seperti batubara, timah, minyak dan gas bumi serta hasil perdagangan pertambangan lainnya. Tujuan dari penelitian ini adalah untuk mengetahui pengaruh Current Ratio (CR) dan Earning Per Share (EPS) terhadap harga saham perusahaan pertambangan yang terdaftar di Bursa Efek Indonesia periode 2013-2015. Populasi sebanyak 120 perusahaan pertambangan yang terdaftar di BEI. Metode pemilihan sampel adalah purposive sampling. Terdapat 36 perusahaan pertambangan yang terdaftar di Bursa Efek Indonesia (BEI) yang digunakan sebagai data sampel. Program SPSS digunakan untuk Analisis regresi berganda dalam menganalisis data. Hasil penelitian ini bahwa current ratio (CR) tidak berpengaruh terhadap harga saham dan earning per share (EPS) berpengaruh signifikan terhadap harga saham.

Kata Kunci : Current Ratio (CR), Earnings Per Share (EPS) dan Harga Saham

Effect of Current Ratio (CR) and Earnings Per Share (EPS) on Stock Price of Mining Company Listed on Indonesia Stock Exchange (BEI) Year 2013-2015

ABSTRACT

Trade mining plays an important role in the economy. Mining is a series of activities in the context of the search, mining, processing, utilization and sale of minerals. Some of the mining product trade are an important trade for the world such as coal, lead, oil and natural gas and the other mining product trades. The purpose of this research is to find out the effects of current ratio (CR) and earnings per share (EPS) on the stock price of mining companies listed on the Indonesia Stock Exchange (IDX) in periods of 2013-2015. The population is 120 mining companies listed on the IDX. Purposive sampling is chosen as the sampling method. There are 36 mining companies listed on the Indonesia Stock Exchange (IDX) used as the sample. An SPSS program used to analyze the data through multiple linear regression analysis. The result of this research shows that current ratio (CR) has an effect on the stock price and earning per share (EPS) has a significant effect on the stock price.
